

RealArt M. tuberculosis TM PCR Reagents*

CE Marked

Description

The M. tuberculosis TM PCR reagents constitute a ready to use system for the detection of M. tuberculosis Complex using realtime PCR in the ABI PRISM® 7000 system.

- The sensitivity of the assay is 1.0 copy per μ l.
- High specificity for the members of the M. tuberculosis complex
 - No detection of MOTTs* or other related bacteria

Recommended Sample Material

- Sputum
- Bronchial alveolar Lavage
- Stomach Fluid
- CSF
- peritoneal function

* Mycobacteria other than tuberculosis

Order Information

Product Name	Package Size	Abbott Order Number
M. tuberculosis	24 tests	03K42-01
M. tuberculosis	96 tests	03K42-03

CE Marked Not available in United States

M. tuberculosis
